

## Robert C. Berwick

Professor of Computer Science and Computational Linguistics at the Massachusetts Institute of Technology. He received his Ph.D. at MIT in Computer Science in 1982, under the joint direction of Noam Chomsky and Marvin Minsky, implementing the first modern computer program to learn language. A Professor at MIT now for over a quarter-century, Professor Berwick has written 8 books and more than 200 articles on the nature of human language and its computational properties, how language is learned, how it develops and differs, and how it evolves and changes over time. He has also written extensively as a critic of evolutionary psychology and sociobiology. He has been honored with a Guggenheim Fellowship as well as MIT's highest award given to faculty for exceptional research and teaching. Co-director of MIT's Center for Biological and Computational Learning, he is current completing a book on the computation and language, to be published this fall, *Against All Odds*.
