A large, light gray globe is centered in the background of the slide. The globe shows the continents and is overlaid with a grid of latitude and longitude lines. The word "Harris" is written in a large, black, serif font across the center of the globe, enclosed in large red square brackets. The globe is partially obscured by the text and other elements on the slide.

[Harris]

Corporation

12,000+ employees

5,000+ engineers
and scientists

Annual sales
over \$3 billion

Founded in 1895

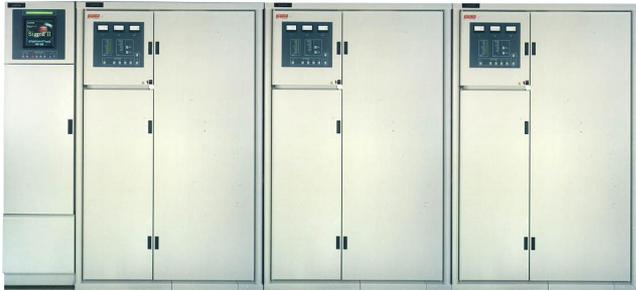

Over 70 years experience
manufacturing transmitters

Expertise in all fields of video
and audio systems

Global Field Service,
Harris Training Center,
24/7 Product Support

Harris TV Product Line Overview

Television Transmitters

**Platinum
Series VHF
Solid State
DTV & Analog**

**Sigma Series UHF IOT
DTV & Analog**

**Diamond CD
UHF Solid State
DTV**

**Platinum HTEL
Series VHF Solid
State Analog**

- *Digital (average) power
1.25 kW to 10 kW*
- *Analog (peak) power
500W to 60 kW*
- *MOSFET Transistors*
- *Air cooled*
- *600 transmitters in service
worldwide*
- *Hot pluggable modules
with distributed and
independent control
system*

Platinum Series

← PTCD20P2 - 5kW →

← PTCD30P3 - 7.5kW →

← PTCD40P4 - 10kW →

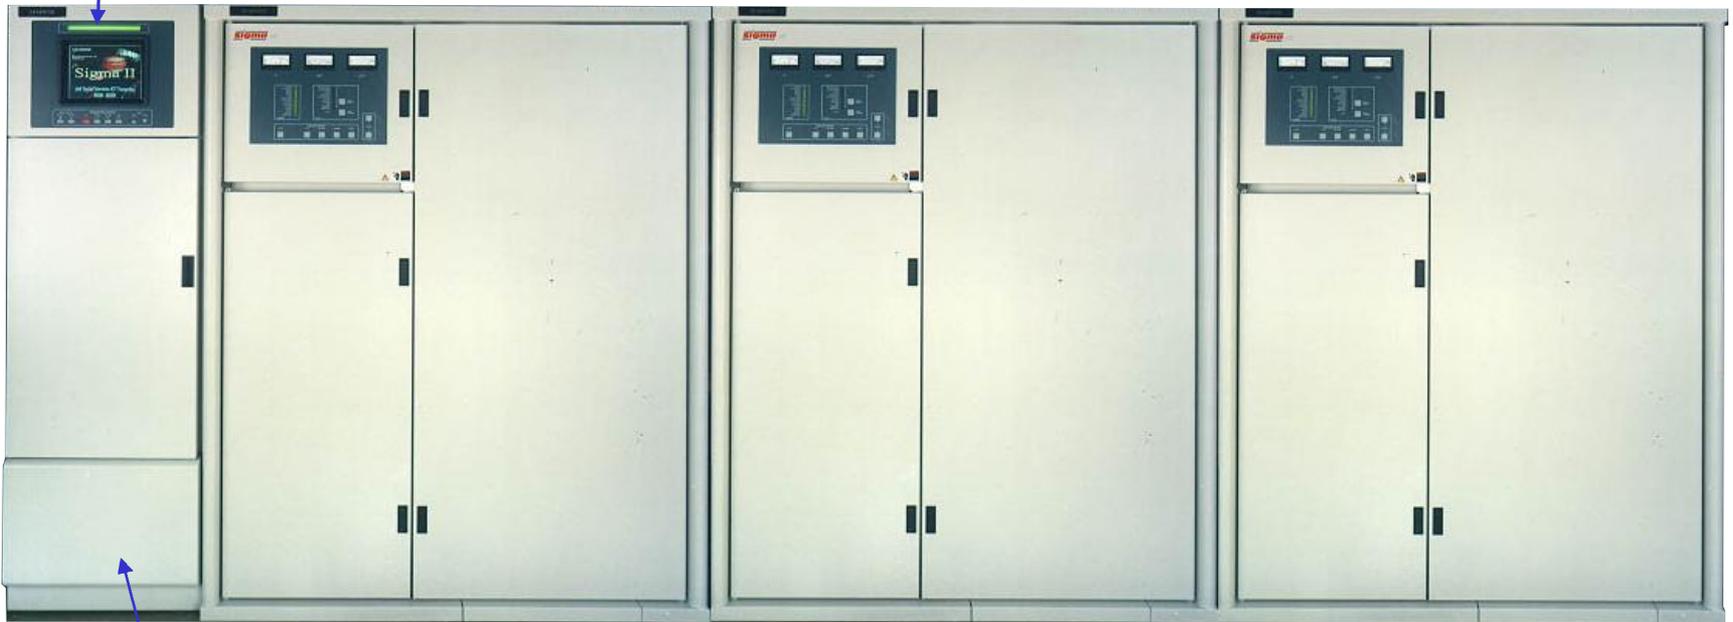

3-Tube Sigma CD-II

Sigma CD2300P3

GUI, Main Controller
& Life Support
Controller

3 Identical PA Cabinets with individual controllers,
IPA's, Power supplies

Exciter/Control
Cabinet

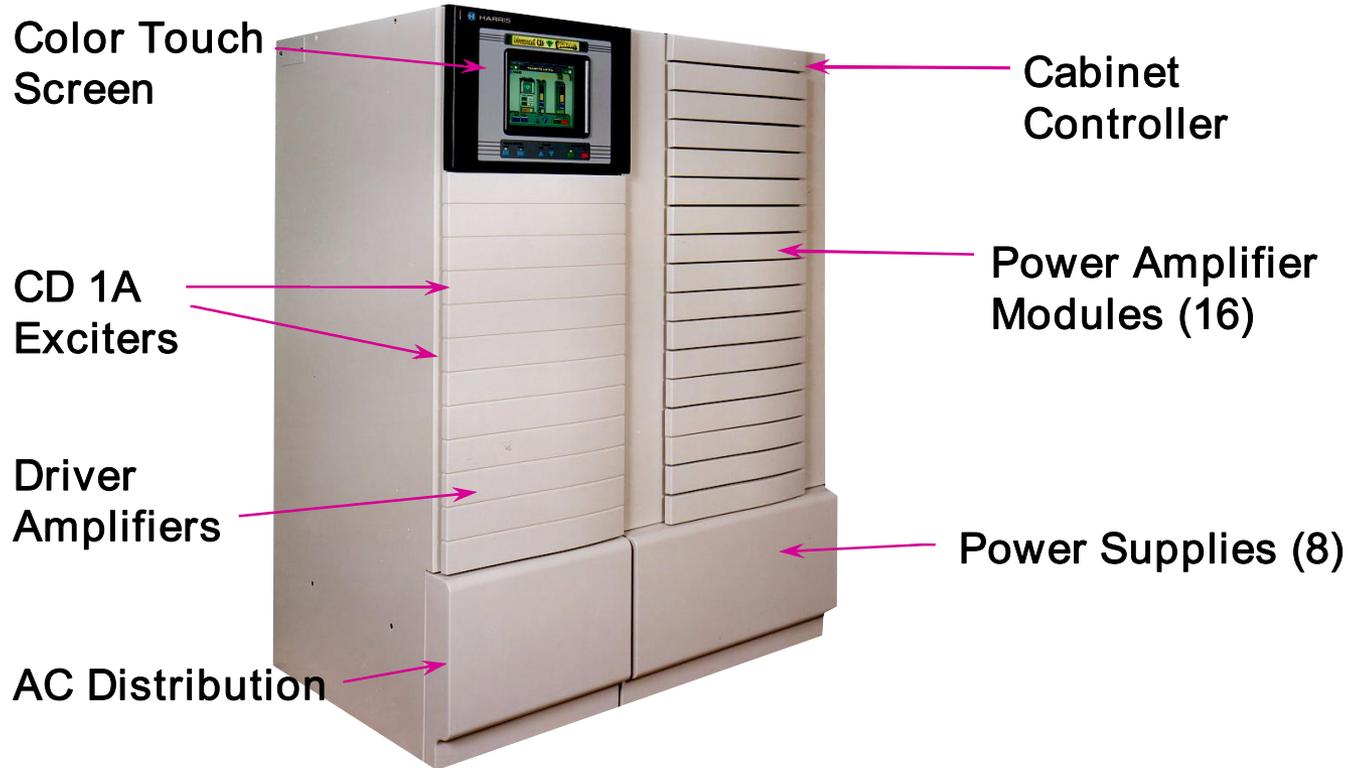

- 1. Individual non-linear correction for each power amplifier***
- 2. Real Time Adaptive Correction (RTAC™)***
- 3. CD Eye monitor software option***
- 4. VSWR foldback on each PA cabinet***
- 5. Solid state class AB IPA's with feedforward***
- 6. Automatic Gain Control (AGC) on each PA***
- 7. Intuitive Graphical User Interface (GUI)***
- 8. Remote control is supported via RS-232 serial or standard parallel***
- 9. Back-up (Life Support) control system***

Diamond CD

- Digital (average) power 1.25 kW to 25 kW
- Solid state design
- LDMOS transistors
- Touch-screen GUI
- Remote control
 - Serial
 - Parallel
- Addresses low-medium power U.S. market
- Air cooled
- Hot pluggable amplifier modules and power supply modules

DiamondCD Transmitter Layout

Diamond CD

Solid State & IOT Tx Comparison

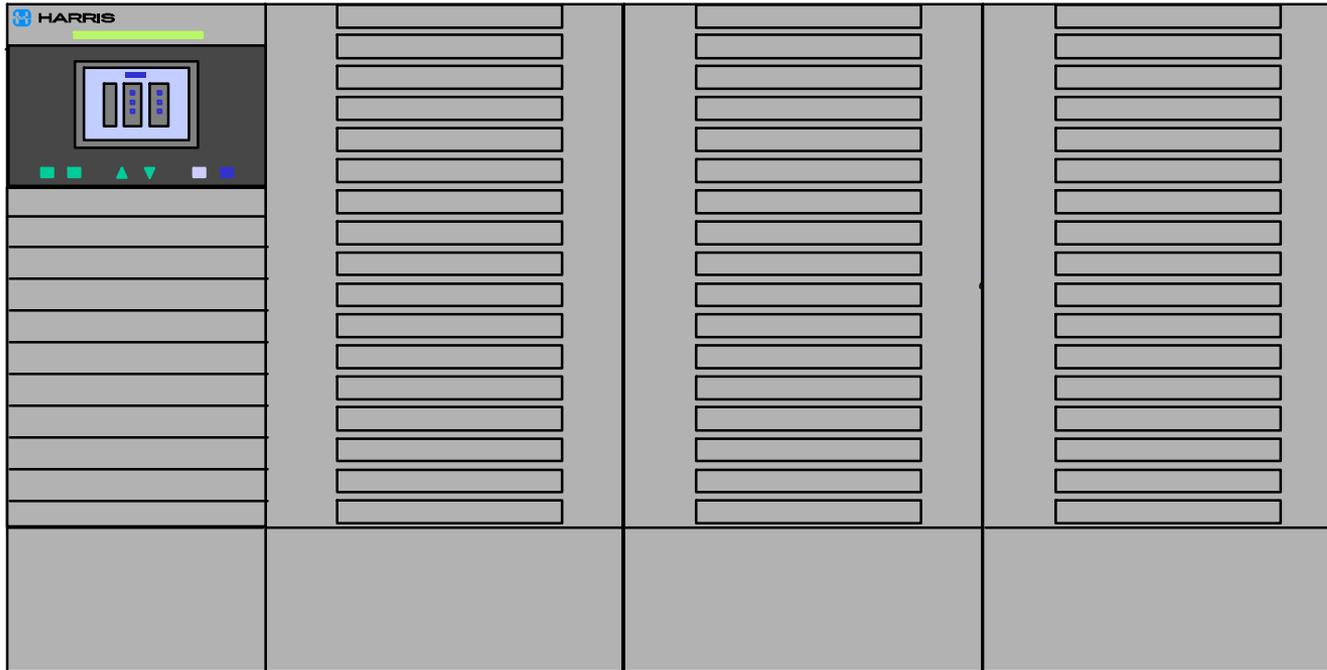

Characteristic	Solid State	IOT
Power: Average Peak	1.25 - 25kW 5 - 100kW	10 - 100kW 40 - 400kW
System cost per Watt (@10kW average power)	Approx. 40% higher*	Reference
10 Year Cost of Ownership	Lowest below 10 kW	Lowest above 15 kW
Redundancy	Very High	Need dual IOT
Performance	Excellent	Excellent
RMS Efficiency	18 - 20%	25 - 30%
Maintenance	1/10 of tube	Reference

** 30% Less than 2-tube system*

Increasing Power Later...

CD 1A 8-VSB Exciter

- Extensive use of DSP technology
- SMPTE 310M input interface
- Patented Design (# 5,801,595) (Digital Modulation Technique)
- RTAC - Real Time adaptive correction
- The “HEART” of Every DTV Transmitter

- UHF & VHF designs
- Slots & Panels
- Single & Multi-channel
- High Power Designs
- Full Far Field Range
- Unique DTV/NTSC combining plans

-
- Status of Broadcast Mobile TV Market
 - Comparisons of Mobile TV Technologies
 - Harris Product Portfolio for Mobile TV
 - Harris Services for Mobile TV
 - Harris Commitment to Mobile TV

Major Mobile TV Technical Trials

<u>Operator</u>	<u>Location</u>	<u>Technology</u>	<u># Users</u>	<u>Partners</u>
Crown Castle	Pittsburgh	DVB-H		Nokia
KPN	Netherlands	DVB-H	200	Nozema, Nokia
Swisscom	Bern	DVB-H	100	
O2	Oxford, UK	DVB-H	500	Arqiva, Nokia
Telstra	Sydney, Australia	DVB-H	1000	Bridge Networks, Broadcast Australia
Vodafone	Germany	DVB-H	500	T-Systems, Phillips
Digita	Helsinki, Finland	DVB-H	500	Nokia, TeliaSonera
RAI	Turin, Italy	DVB-H		
Orange	Paris, France	DVB-H	500	Nokia, Towercast, Canal+, TDF
Telefonica	Madrid & Barcelona	DVB-H	500	Albertis Telecom, Nokia
MediaFLO	San Diego, CA	FLO		Qualcomm
Various	Seoul, So. Korea	T-DMB		Samsung, LG
BLM	Regensburg & Munich	T-DMB		Samsung, LG
TF1	Paris, France	T-DMB		VDL

Harris Participation

	<u>FLO</u>	<u>DVB-H</u>	<u>T-DMB</u>
VHF/DAB	<i>None</i>	DVB committee developing mod to handle DAB channels	Korea on-air with modified DAB transmitters
UHF	On-air in San Diego; planning demos in Asia & Europe <i>12/1/05: Verizon Wireless signs to offer MediaFLO</i>	Approx. dozen trials in Europe & Australia	<i>None</i>
1.4GHz/DAB	<i>None</i>	DVB committee developing mod to handle DAB channels	Trials in France & Germany
1.67 GHz	<i>None</i>	Crown Castle on-air in Pittsburgh, installing in NYC	<i>None</i>
2.6 GHz	Potential	Potential	<i>None</i>

Commercial Activity	Potential Spectrum	No Current Activity
---------------------	--------------------	---------------------

Mobile TV Spectrum Alternatives

	<u>Existing Services</u>	<u>Spectrum Availability</u>	<u>>5 MHz Channel Plans</u>	<u>Propo- gation</u>	<u>Antenna Gain</u>	<u>Cost of Imple- mentation</u>
174-240 MHz	DAB	-	-	+	-	+
470-806 MHz	TV	+	+	+	0	+
1452-1492 MHz	DAB	-	-	0	+	0
1600-1700 MHz	Misc	0	0	0	+	0
2500-2700 MHz	MMDS	+	+	-	+	-

+ = Advantage

0 = Neutral

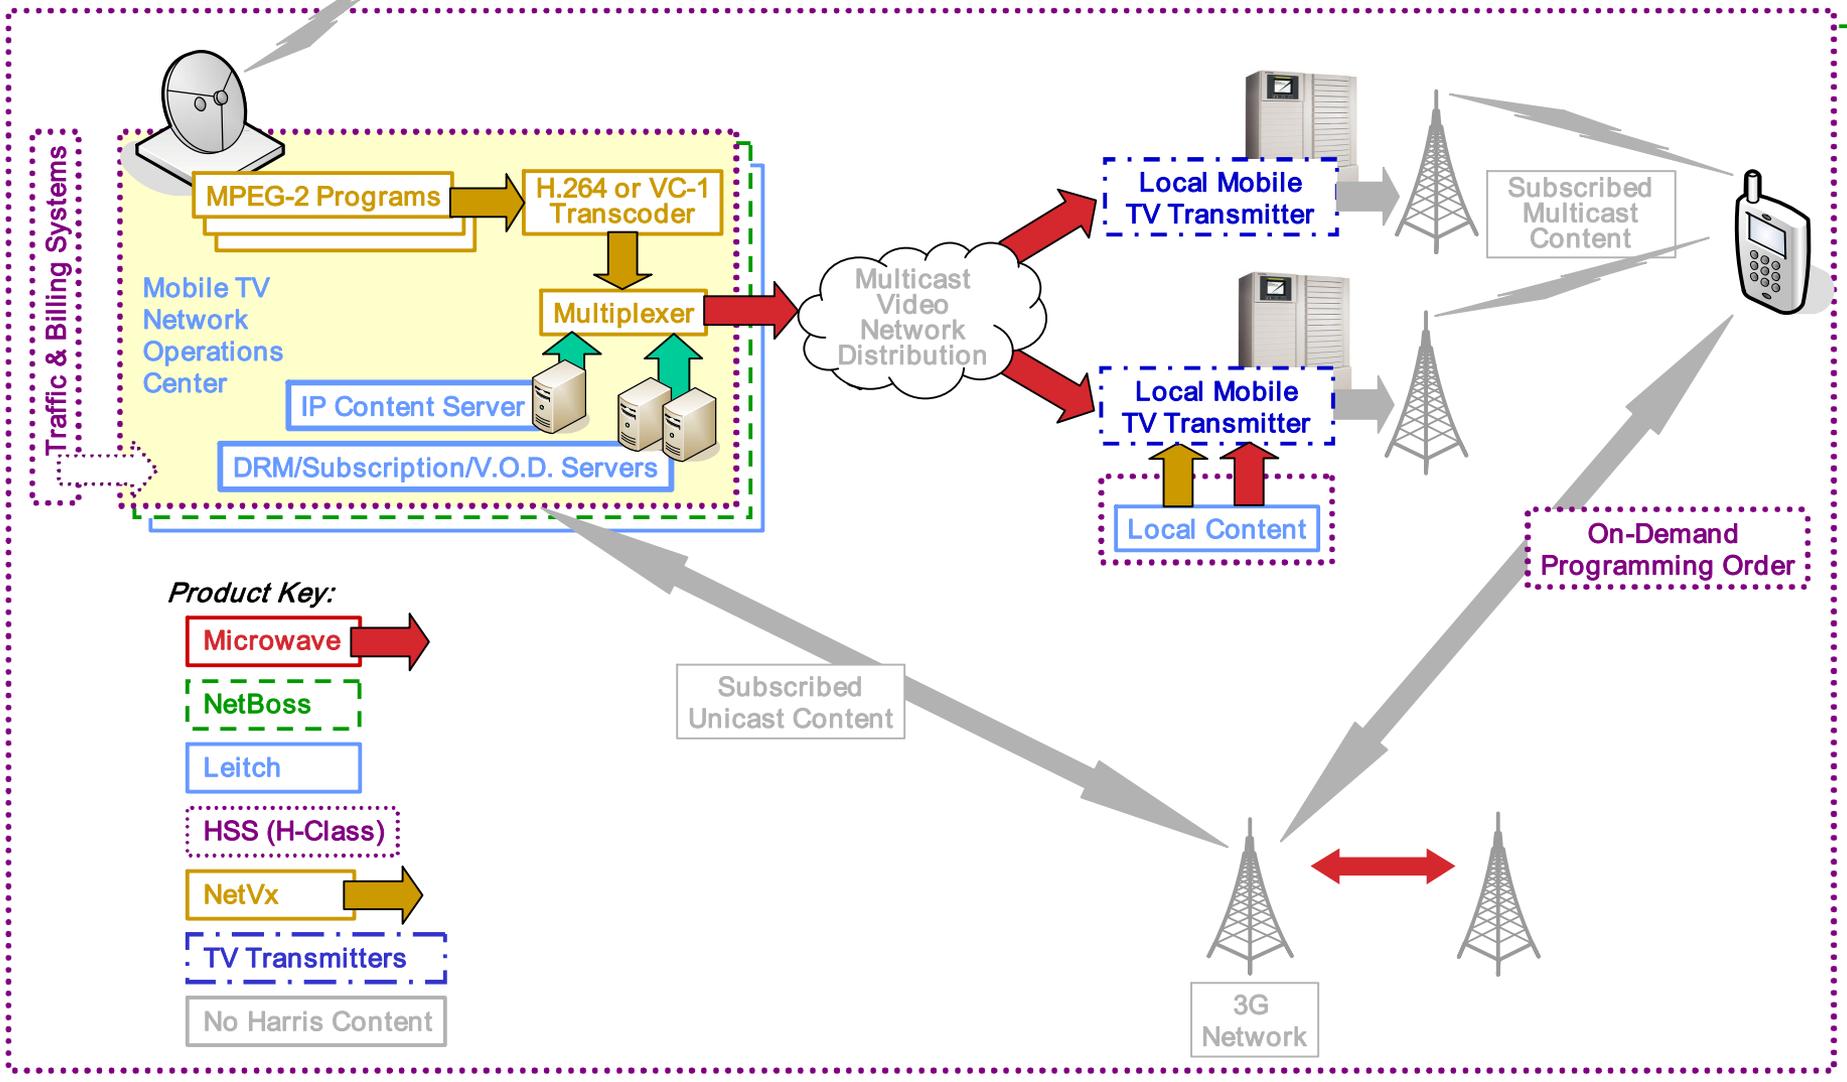

- = Disadvantage

Mobile TV Modulation Approaches

	<u>Source Coding</u>	<u>Channel Coding</u>	<u>Transport Stream</u>	<u>Modulation</u>	<u>RF Channel Size</u>	<u>Typical Video Ch per RF Channel</u>	<u>Local Content Injection</u>	<u>Power Reduction Method</u>
DVB-H	H.264 or VC1	Convolution & Reed Solomon	IP	QPSK/ 16QAM COFDM	5/6/7/8	15	Requires Mixed SFN/MFN	Time-Slicing
FLO	H.264	Turbo & Reed Solomon	IP	Layered 16QAM COFDM	5/6/7/8	20	Yes, SFN	Time-Slicing
T-DMB	H.264	Convolution & Reed Solomon	MPEG2	Differential QPSK COFDM	1.5	5	Requires Mixed SFN/MFN	Bandwidth Shrinking

Harris Mobile TV Opportunities

- Transmitter Products

- DVB-T / DVB-H UHF Transmitters up to 9 kW
- DVB-T / DVB-H VHF Transmitters up to 500 W
- Synchrony SFN adapter for single frequency DVB-H networks
- DVB-H 1670 MHz Transmitters up to 400 W
- FLO capable UHF & VHF transmitters, 100 W to 60 kW

- Solution Products

- Leitch Solutions for Studios and TV Head-ends (servers, routers, switchers, distribution amplifiers, Videotek test & measurement equipment)
- H-CLASS Enterprise Content Management Systems
- NetVX MPEG Compression and Multiplexing Systems
- TruPoint Microwave Link Products
- NetBoss Enterprise Network Management Systems

Converter**

**Broadband
Amplifier**

**Final
Amplifier**

- DVB-T/DVB-H head-end SFN adapter for Single Frequency Broadcasting
 - Two ASI inputs for redundancy operation or hierarchical modulation
 - Meets DVB ETS 300 744 and DVB TS 101 191
 - Bit rate adaptation and PCR restamping
 - Internal PRBS generators
 - TCP/IP/SNMP interface for use in global network management systems
- Features
 - 6/7/8 MHz user selectable
 - Internal HTTP server
 - Hierarchical modes
 - Internal GPS receiver option
 - Fully DVB-H compliant

- Initially developed for Modeo
- Power levels: 50 to 400 watts, single and diversity output versions
- Designed for outdoor installations without need for a rack air-conditioning unit
- *Convection Cooled Technology™*—developed in conjunction with Harris Government Communications Systems Division
- Introducing at NAB 2006
- Shipping in July 2006
- Potential platform for other L-band applications and longer term for UHF requirements

OFDM
Modulator

- Technology base in amplification, modulation
 - Modulation: DVB-H, FLO, and DAB (T-DMB)
 - Frequencies: VHF (TV and DAB), UHF, L-Band (DAB and DVB-H)
 - Powers: 100 watts to 100,000 watts
 - Single Frequency Network enablers
- Largest digital video transmitter installed base
- Network operations and service expertise
- Leading transmitter manufacturing capacity
- Global brand strength and broadcast experience

- Harris Broadcast Communications: largest broadcast transmission services organization in the world
 - Installation services
 - Remote diagnostics
 - Contract services
 - Spares and repairs
- Harris Technical Services
 - Experienced IT and communications infrastructure services, including FAA modernization program
- Harris Central Control & Monitoring
 - Melbourne, FL site, monitoring Harris NetVx video encoding equipment used in FOX Sports Network

- DVB-H
 - Fully integrated DVB-H transmission products
 - Harris DVB-H transmitter @ 1670 MHz on air in Crown Castle Pittsburgh test (400 W)
- FLO
 - FLO-compatible exciter based on its market-leading ATSC exciter, the Apex (over 600 Apex exciters in service)
 - All Harris ATSC transmitters, from 100 W to 60 kW, are ready to be qualified for FLO applications
- T-DMB
 - Harris DAB transmitters support major T-DMB initiatives
- Overall: Harris has identified and committed to Mobile TV as a major corporate initiative
 - Active in FLO Forum, DVB, and DAB organizations
 - Vice Chair, TIA TR47 (Mobile Multimedia Standardization)
